1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

2. Pursuant to MPEP 606.01, the title has been changed to read:

-- A SYSTEM USING MULTIPLE SETS OF DEVICE MANAGEMENT  
POLICIES FOR MANAGING NETWORK DEVICES CONNECTED ON  
DIFFERENT NETWORK INTERFACES --

3. The following is an Examiner's Statement of Reasons for Allowance:

Sarnikowski et al., Patent No. 6,847,609, teach data from multiple link layer connections, such as PVC for Frame Relay, is sent to the appropriate Abstract Service Layer Devices (ASLD). The ASLD allows the higher protocol and application layers to be independent of the physical and link layers. This architectural allows multiple physical network interfaces supporting different service delivery methods (e.g., Frame Relay, ATM, PPP) to be supported on the same service delivery unit simultaneously without changing higher layer support. In addition, a bandwidth management utilizes global policies stored in a policy server to control the allocation of bandwidth in the wide area network so that the valuable WAN bandwidth resources are used effectively. The prior art of record teaches the claimed invention substantially as discussed above, but it fails to teach or suggest individually or in combination that a method for managing a

network of devices, the method comprising: associating a first set of device management policies with a first network interface; associating a second set of device management policies with a second network interface, wherein the second network interface is different from the first network interface; registering a first network device, wherein registration includes identifying the first network interface as an interface from which the first network device can be managed; registering a second network device, wherein registration includes identifying the second network interface as an interface from which the second network device can be managed; based on the registration of the first network device, managing the first network device based on the first set of management policies; and based on the registration of the second network device, managing the second network device based on the second set of management policies as set forth in claims 1-34. Claims 1-34 are allowed because of the combination of other limitations and the limitation listed above.

4. Examiner interprets the limitation "computer-readable storage medium" as a device that stores computer instructions and participates in providing the computer instructions to a computer processor for execution. The computer-readable storage medium includes non-volatile media, volatile media, computer storage devices and memories. For example, optical or magnetic disks, ROMs, PROMs, EPROMs, EEPROMs, RAM, hard disks, CDs, DVDs. The "computer-readable storage medium" does not include acoustic or electromagnetic waves, such as those generated during radio-wave, infra-red, and optical data communications.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Le Luu whose telephone number is 571-272-3884. The examiner can normally be reached on 8:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on 571-272-3880. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
